PROFESSIONAL SUMMARY

Junior Front-End Developer and Web Design and Coding graduate with hands-on experience building responsive and user-friendly web interfaces through personal, academic, and practical projects. Skilled in HTML5, CSS3, JavaScript, React, Tailwind CSS, Bootstrap, and Sass, with experience using Git, GitHub, REST APIs, and responsive web design practices. Experienced in troubleshooting coding and technical issues, reviewing and correcting code, and supporting students with web development problems. Passionate about continuous learning and professional growth, with a strong interest in developing my front-end skills while gaining practical experience in a professional environment.

EXPERIENCE

Technical Student Supervisor — Cloud Soft | Cloud Soft Educational Platform, Turkey

01/06/2025 – 01/03/2026

- Troubleshoot and resolved students' technical and coding issues related to HTML, CSS, JavaScript, and web development.
- Reviewed and corrected code, identified technical errors, and guided students toward practical solutions.
- Provided technical support for website development tasks, project issues, and programming-related questions.
- Explained web development concepts and helped students understand and resolve coding problems.
- Supported students throughout their learning process by providing technical guidance and troubleshooting assistance.

PROJECTS

Tailwind CSS Challenge — Built responsive web interfaces using Tailwind CSS utility classes, layout systems, spacing, and typography. Completed a focused 13-day challenge and published the project through GitHub and Vercel.

Live Demo: tailwindcss-challenge-main.vercel.app | GitHub Code: github.com/ismailhalvi/tailwindcss-challenge-main

Book Store — Developed a responsive React bookstore interface with Strapi/API integration, book categories, book details, and an Arabic user interface.

Live Demo: book-store-ruddy.vercel.app | GitHub Code: github.com/ismailhalvi/book-store

Real Estate Website — Created a responsive real estate website using Sass, organized styles and layouts, and published the project through GitHub Pages and Vercel.

Live Demo: real-estate-sass-main.vercel.app | GitHub Code: github.com/ismailhalvi/RealEstate-SASS-main
